Jennifer and Bill,

I think that we have only received mouse stations so far. I am correct here.

Thank You,

---

Good afternoon,

The PMRA is currently working on requiring additional risk mitigation measures for rodenticides, similar to those required by the EPA in their 2008 *Risk Mitigation Measures for Ten Rodenticides*.

Bo Davis had mentioned that the EPA has received at least one submission for products packaged with Tier 1, 2 or 3 bait stations. I would like to know if the issue of bait stations for rats vs mice has come up. Considering that bait stations used for rats and mice are of different sizes, have registrants come in with two submissions (one product packaged with mice BS and one with rat BS) for the same product? Or are registrants coming in with bait stations that would be used for both (i.e. only big bait stations)?

Any information you can provide on this question would be appreciated.

Thank you for your assistance,

*Anie Lauzon*
